What Is Being Done?

The Michigan Department of Transportation will begin construction on US-24 (Telegraph Road) near Monroe this summer.

Improvements include:

- Resurfacing and widening the roadway to five lanes between Stewart Road and LaSalle Road;
- Widening and replacing culverts at Little Sandy Creek, the Grosvenor Drain and the Campau Drain;
- Constructing an offset right-turn lane on northbound US-24 at Hurd Road; and
- Adding center left-turn lanes on Hurd Road at US-24.

This project also includes water main relocation and upgrades, new curb and gutter, and storm sewer improvements.

When Will This Be Done?

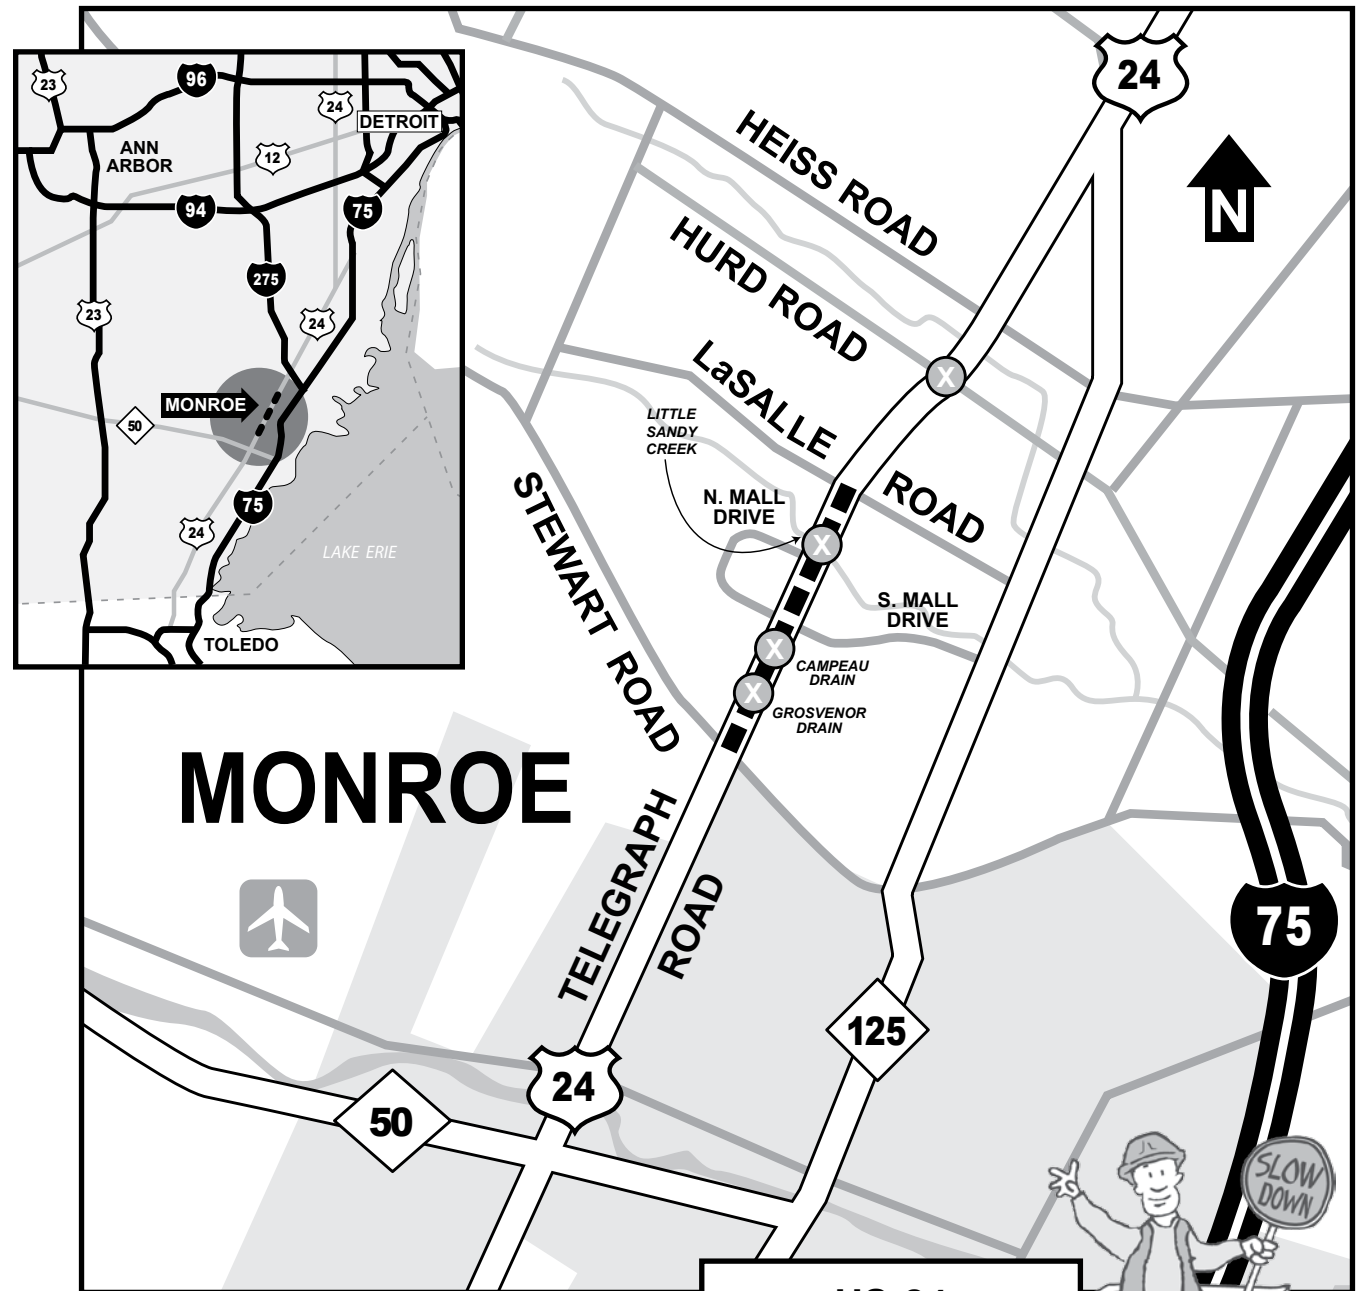

Construction is expected to start in mid-summer, with work carrying over into the 2012 construction season. All work is expected to be complete by fall 2012.

How Will Traffic Be Affected?

To minimize the disruption to motorists, residents and business owners, construction will take place in stages.

For work on US-24, construction will take place along one-half of the roadway at a time. One lane of US-24 traffic will be maintained in each direction with left turns prohibited for the majority of the project at Stewart Street, South and North Mall drives, LaSalle Road and Hurd Road.

Telegraph Road will be closed for approximately three weeks during culvert work at Little Sandy Creek. The posted detour will include M-125 and Stewart Road.

Long-term Benefits

MDOT's 2011 road and bridge program supports the creation of jobs, growth of the economy, preservation of the environment and the safety and security of the transportation system.
